

## Calling all practice nurses and healthcare assistants

Do you want to be involved in our research studies?

### What are the benefits to your patients?

Many studies involve close monitoring, so problems can be identified before they become established  
Patients respond to interest in them and their problem(s) and generally do better than patients not participating in research <sup>1</sup>

### How will the practice benefit?

We pay Service Support Costs  
Research activities may count towards QOF domains  
Professional development

### Interested but you don't have the time?

Some studies can be completed in two hours  
FREE research-related training is offered  
BACKFILL is funded by us so you can attend

### To learn more, contact the Research Co-ordinators
